## 1. INTRODUCTION

### 1.1 Background

- 1.1.1 SYSTRA Ltd has been appointed by Westar Homes Ltd (the applicant) to produce a residential Mobility Management Plan (MMP) to accompany a planning application for a residential development at Finlay Park in Naas, County Kildare.
- 1.1.2 The Mobility Management Plan is one of the mitigation measures proposed by the Transport Assessment (TA) to address the forecast transport impacts of the development, and has been prepared as a Pre-Occupation Plan to support the planning application.
- 1.1.3 This Mobility Management Plan report should be read in conjunction with the accompanying TA, which provides further detail on existing and proposed facilities, and the access strategy for the development.

### 1.2 Mobility Management Plan Approach

- 1.2.1 This MMP has been prepared to guide the delivery and management of a package of initiatives that will encourage sustainable travel amongst residents.
- 1.2.2 The MMP responds to the detail contained in KCCs Scoping Opinion. It includes:
  - (a) Full details of all existing public transport links and timetables serving Naas and links to commuter rail timetables at Sallins. This is also to list all public transport links to prominent employment centres in order to reduce car borne journeys.*
  - (b) Existing and proposed walking and cycling routes in Naas. The applicant will be required to have consideration to the Naas Sallins Transport Strategy and the Naas Sallins Greenway project.*
  - (c) The manner in which the Mobility Management Plan will be made available to future residents.*
  - (d) During the lifetime of this Mobility Management Plan, the developer shall submit annual survey results of the modal splits and origin of trips of staff and future residents of the development.*
- 1.2.3 A successfully implemented MMP can help to reduce car use (particularly single-occupancy car travel), and increase trips by public transport, walking and cycling.
- 1.2.4 MMPs also have the associated benefits of improving health and well-being (through more active travel), and reducing the transport-related carbon impact of the development.

## 1.1 Local Planning Policy

### Draft Kildare County Development Plan 2023-2029

- 1.1.1 On 11th January 2021, Kildare County Council gave notice of its intention to review the existing Kildare County Development Plan 2017-2023 and to prepare a new County Development Plan for the period 2023-2029.
- 1.1.2 The review is currently ongoing, and will conclude with the adoption of the Kildare County Development Plan 2023-2029 in 2023.
- 1.1.3 The Draft KCDP has been published for consultation (which closed in May 2022), and the Proposed Material Alterations have now been published.
- 1.1.4 Chapter 5 of the Draft KCDP relates to ‘Sustainable Mobility and Transport. Its overall aim is, *“To promote and facilitate ease of movement within and access to County Kildare, by integrating sustainable land use planning and a high-quality integrated transport system; and to support and prioritise investment in more sustainable modes of travel, the transition to a lower carbon transport system, and the development of a safer, efficient, inclusive, and connected transport system”*
- 1.1.5 This draft County Development Plan (CDP) contains a series of sustainable transport goals, policies and objectives for healthy placemaking and sustainable movement that, over time, will achieve an increase in walking, cycling and use of public transport and a decrease in the use of the private car.
- 1.1.6 The Plan cites the ‘Get Ireland Walking’ guidance, which states that an individual can walk 1km in approximately 10 minutes. This means that many trips of up to 3km can be made by walking or cycling. It notes that within urban areas in Ireland, cyclists typically travel between 15 and 20km/h, which translates to approximately 3km in 10 minutes. Therefore, many of the car-based journeys between 3km and 6km can be done by cycling. Similarly, many of the car-based trips for distances greater than 6km can be undertaken by public transport, where it is available.
- 1.1.7 It is these shifts, to walking, cycling and public transport that the MMP is seeking to encourage. The Plan therefore fully supports the measures that are set out in this MMP, and, like the MMP, sets mode share targets as part of the plan-making process.

## 1.2 Report Structure

- 1.2.1 This report provides the background, context, and objectives of the plan, and sets out a package of sustainable transport measures. A strategy for the implementation of the plan, including target setting and monitoring is also presented.

1.2.2 Following this introductory chapter, the report is structured as follows:

- **Chapter 2:** An introduction to Mobility Management;
- **Chapter 3:** A summary of site accessibility by sustainable modes;
- **Chapter 4:** Facilities to support sustainable travel within the development;
- **Chapter 5:** Existing Baseline mode share;
- **Chapter 6:** MMP objectives and targets;
- **Chapter 7:** MMP Action Plan;
- **Chapter 8:** MMP Monitoring and review; and
- **Chapter 9:** Summary.

## 2. MOBILITY MANAGEMENT: CONTEXT

### 2.1 What is Mobility Management?

2.1.1 Mobility Management aims to promote sustainable travel options (e.g., walking, cycling and public transport) and reduce car use amongst targeted groups such as residents or employees. The use of Mobility Management is well established in Ireland through the Development Control process and the policy documents set out in Chapter 3. The process involves key stakeholders such as the Local Authority, public transport operators, the developer, and future residents.

### 2.2 The Benefits of Mobility Management

2.2.1 Implementing a Mobility Management Plan has the following potential local benefits:

- The local environment will be improved from reduced congestion, carbon emissions, pollution, and noise;
- A range of travel options makes the development site attractive to potential residents;
- The MMP will increase opportunities for active healthy travel, such as walking and cycling;
- The MMP can reduce demand for parking spaces, enabling land to be put to more cost-effective or commercially beneficial use and freeing space for active travel initiatives; and
- The MMP will result in improved travel choice, quality, and affordable access to services for all users.
- An MMP can also reduce the number and length of trips undertaken / required (for example through the promotion of internet shopping and home working, and the provision of an on-site parcel delivery services).

### 2.3 Mobility Management Plan Objectives

2.3.1 The overarching objectives of the MMP are to reduce levels of private car use by encouraging people to walk, cycle, use public transport, car share.

2.3.2 The specific objective(s) of an MMP can vary depending upon the organisation, site characteristics and specific land uses which vary with each site. Nevertheless, in the context of a residential MMP, objectives can include:

#### **Residents**

- Address residents' need for sustainable access to a full range of facilities for work, education, health, leisure, recreation, and shopping;
- Promote healthy lifestyles and sustainable, vibrant local communities by improving the environment and the routes available for cycling and walking;

## The Local Community

- Make local streets less dangerous, less noisy, and less polluted and enhance the viability of public transport;
- Reduce the traffic generated by the development for journeys both within the development and on the external road network;
- Promote equal opportunities by offering wider travel choices;
- Improve personal and wider community health; and
- Reduce air and noise pollution.

## 2.4 Making Residential Mobility Management Plans Work

2.4.1 The residential MMP ‘pyramid’ below demonstrates how successful plans are built on the firm foundations of location and site design. A residential MMP should combine hard measures (e.g., cycle parking, routes to bus stops) and soft measures (such as welcome travel packs and personalised journey planning). All measures should be integrated into the design, marketing, and occupation of the site – with parking restraint often crucial to the success of the MMP in reducing car use.

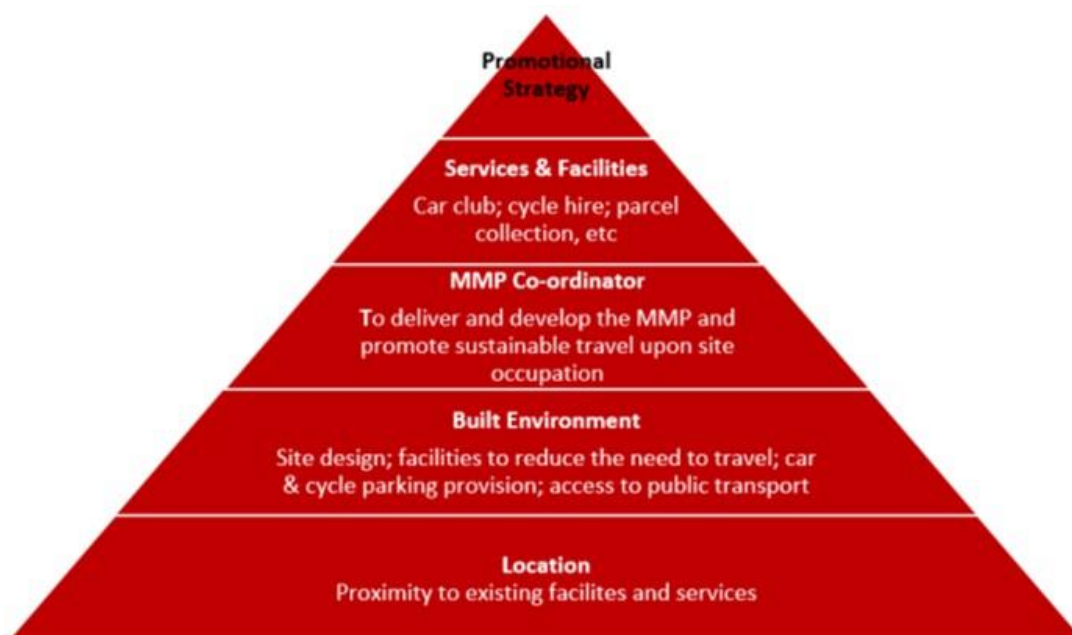

Figure 1. The Travel Plan Pyramid

2.4.2 MMPs are ‘live’ documents that should be regularly reviewed and updated. In this way, MMP targets and Action Plans can be reviewed and tailored to take account of ongoing changes in travel patterns, technologies and services. It is therefore intended that this MMP is the starting point of a live process and will be updated on an annual basis or when required by other circumstances. MMP specific objectives should be ‘SMART’ (Specific, Measurable, Achievable, Realistic and Time-Bound).

### 3. SITE ACCESSIBILITY

3.1.1 Full detail on the pedestrian, cycle, public transport and vehicular connections to the site are provided in the accompanying Transport Assessment. A summary is provided below.

#### 3.2 Pedestrian Links

3.2.1 Removing the requirement to travel by car is one of the easiest ways to encourage sustainable travel. In this respect, the site’s relatively central location within 800m of Naas town centre is an advantage, as are the good quality walking and cycling links which are already present in the area.

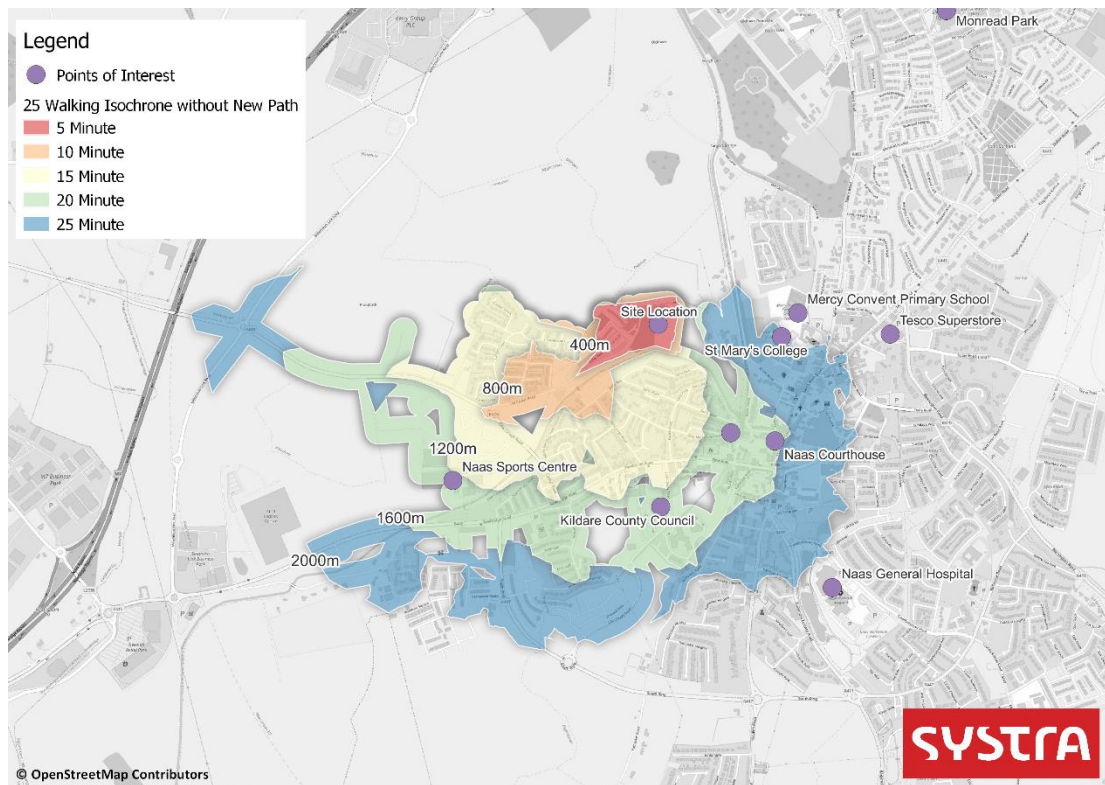

**Figure 2. Pedestrian Routes**

3.2.2 The main existing pedestrian routes from the site are:

- To the Grand Canal (east) and Naas town centre via Old Caragh Road and Ploopluck bridge, and then either via Sarto road, Pacelli Road or the riverside walk. This is a distance of ~1.4km; and
- To the K-Leisure sports centre 1.2km to the west, via the Naas Historic Trail alongside the Grand Canal. This is approximately a 16-minute walk.

3.2.3 **Figure 3** displays the walking catchment of the site at 5-minute intervals, up to a 20-minute walking time.

**Figure 3. Walking Catchment of the Site**

3.2.4 **Figure 3** shows that that majority of main destinations within the Naas urban area (including the town centre) are within are within a 15-20-minute walk from the site.

### 3.3 Cycle Links

3.3.1 **Figure 4** shows the existing cycle infrastructure in the vicinity of the site.

**Figure 4. Cycle Infrastructure in the vicinity of the Site**

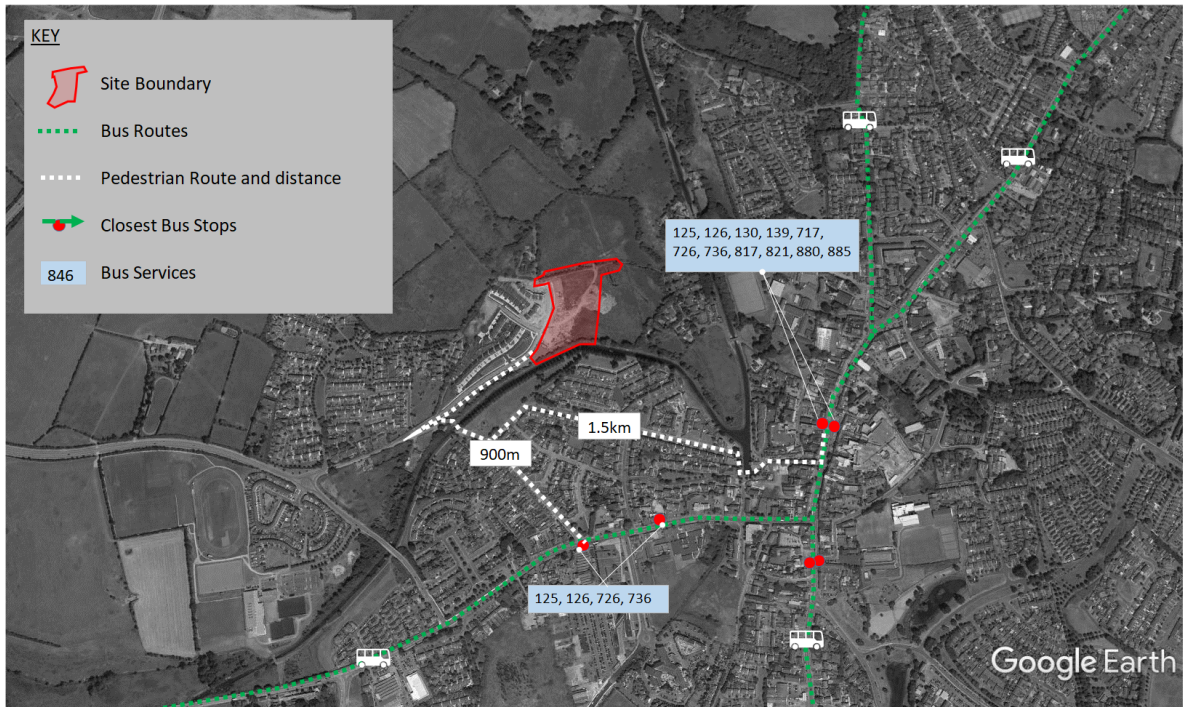

3.3.2 The site is well-connected to both the town centre and recreational routes by the cycle infrastructure in the vicinity of the site, which comprises:

- 2m-wide cycle tracks on both sides of R409 Cois ne Feadain to the west the Old Caragh Road, with a spur on the south of side of the road connecting into the K Leisure site.
- A 3m-wide shared walking and cycling facility on the north side of Old Caragh Road between Caragh Court and the Ploopluck footbridge;
- 1.5m-wide cycle tracks on both sides of Old Caragh Road between Ploopluck cycle / footbridge and the site boundary;
- An off-road surfaced route in both directions along the south bank of the Grand Canal, which is part of the Naas Historic Trail;
- Quiet roads / paths along both sides of the Grand Canal to the east of the site; and
- The Caragh Road / St Bridget’s Terrace Shared Surface area.

3.3.3 The whole of the Naas urban area is within a 10-minute cycle journey of the site, which demonstrates the potential for encouraging cycle trips from the development for commuting, commercial and recreational purposes.

### **3.4 Bus Accessibility**

3.4.1 **Figure 5** shows the closest bus stops to the site, along with the pedestrian routes to them from the site boundary.

**Figure 5. Bus Stops & Walking Distances from Site**

3.4.2 The closest bus stops to the site are a pair of eastbound and westbound stops on R445 Newbridge Road, to the east of the junction with Caragh Road. These are 900m distant from the site boundary, which corresponds to an approximate 11-minute walking time.

3.4.3 **Table 1** outlines the frequency of the bus services at the stops shown in **Figure 5**.

**Table 1. Bus Routes & Frequencies**

Route	Operator	Weekday			Weekend		
		AM Peak	Interpeak	PM Peak	Sat	Sun	
125	Newbridge to Naas and Dublin	Go Ahead Ireland	Two services between 7am and 8am	No service	Two services between 6pm and 7pm	-	-
126	Rathangan - Kildate - Newbridge - Naas - Dublin	Go Ahead Ireland	30 mins	30 mins	30 mins	30 mins	30 mins
130	Athy - Naas - Dublin	Go Ahead Ireland	Two services between 6am and 8am	120 mins	One service	4 services per day	3 services per day
139	Naas to Blanchardstown	JJ Kavanagh & Sons	1 Service	120 mins	120 mins	120 mins	120 mins
717	Dublin Airport - Dublin City - Kilkenny - Clonmel	JJ Kavanagh & Sons	One service at 07:25	No service	One service at 18:55	As weekday	
726	Dublin Airport- Portlaoise-via Kildare, Naas, Newbridge and Red Cow Luas	Dublin Coach	60 mins	60 mins	60 mins	60 mins	60 mins
736	Dublin Airport - City - Carlow - Kilkenny - Waterford	Kenneally's Bus Service	No service	3 services per day	No service	-	-
817	Kilkenny - Dublin	JJ Kavanagh & Sons	No service	1 service	1 service	-	-
821	Newbridge to Sallins Rail Station	TFI Local Link	1 service	2 services	1 service	As weekday	3 services per day
880	Dublin - Cork Route	TFI Local Link	3 services	60 mins	3 services	As weekday	No Service
885	Ballymore Eastace to Sallins Rail Station	TFI Local Link	1 service	1 service	1 service	-	-

3.4.4 The majority of the services travel through Naas in an east-west direction, between Newbridge and Dublin. Services 139 and 821 travel north-south, providing links between Naas, Sallins and its rail station. A selection of key employment centres, and the bus journey time to them from Naas, are summarised below:

- Sallins and Naas Rail Station – 10 minutes;
- Newbridge – 18 minutes;
- Red Cow Luas – 30 minutes;
- Dublin Airport – 45 minutes;
- Dublin City Centre (Connolly Station) – 50 minutes; and
- Citywest Business Campus – 60 minutes.

3.4.5 The above list demonstrates that a wide range of employment centres is within a one-hour bus journey from Naas, and therefore that bus travel represents a viable option for Finlay Park residents.

3.4.6 Full bus timetables are included in **Appendix A**.

### 3.5 Rail Accessibility

3.5.1 Sallins and Naas railway station is located in the centre of Sallins, 3km to the north of the site.

3.5.2 The station is on the Dublin Heuston to Cork rail line. Regular services operate throughout the week, with typically 2-3 services per hour in both directions. The journey time between Sallins / Naas and Dublin Heuston for direct trains is typically 22 minutes, and for trains which stop at intervening stations it is typically around 31 minutes.

3.5.3 The station is also on the following rail lines:

- Dublin Heuston to Galway
- Dublin Heston to Limerick and Ennis
- Dublin Heuston to Waterford
- Galway to Limerick
- Dublin Heuston to Portlaise (bus connection from Sallins)

3.5.4 Trains from Sallins / Naas on the above lines are less frequent than Dublin-bound services, and are typically limited to between 2 and 4 services per day.

3.5.5 Timetable information is regularly updated on the Irish Rail website <https://www.irishrail.ie/en-ie/station/sallins-and-naas>. Full rail timetables are included in **Appendix B**.

3.5.6 Cycle times to Sallins Rail Station from the centre of Naas, travelling along Canal Bank, are approximately 12 minutes.

3.5.7 Bus Service 139, operated by JJ Kavanagh and Sons runs between the centre of Naas and the Sallins Rail station (and onwards to Maynooth, Leixlip, Ongar and Blanchardstown). It runs at two-hourly intervals Monday to Sunday, taking 10-15 minutes to travel between Naas and the Station. A return fare from Naas costs 3 Euro.

3.5.8 The rail station is approximately an 10-minute drive from the Finlay Park site, and there are 390 pay and display car parking spaces available for commuters.

3.5.9 Travelling to the station (Either by bike, bus or car), and then commuting onwards by train to Dublin is therefore a relatively convenient option for future residents of Finlay Park.

### 3.6 Future Connectivity

3.6.1 The Naas Sallins Transport Strategy (2020) identifies a multi-modal package of preferred measures, which are earmarked to be delivered in the short, medium and longer term over the next ten years. The site is not reliant on these, but will benefit from the interventions.

3.6.2 Eight measures that are identified in the Strategy are considered to have the potential to interact with the Finlay Park development. These are:

- PT2 Bus Interchange at Naas Harbour;
- PT4 Western Spine' Local Bus route;
- PT 11 Bus -Only' link to Sallins Bypass;
- RD3 Millbridge Street Road Link;
- C1 Naas to Sallins Greenway;
- C16 Northwest Quadrant Link Road Cycle Route;
- C36 Abbey Street Shared Street improvement; and
- C37 Basin Street Shared Street improvement.

3.6.3 The locations of the above options are shown in **Figure 6**.

Figure 6. NSTS Preferred Options affecting Finlay Park Site

3.6.4 The above developments will deliver improved connectivity to residents of Finlay Park, particularly strengthening local walking and cycling links into the town centre and canal Greenway, and public transport connections to the Sallins and Naas rail station.

### 3.7 Public Transport Capacity

#### Existing Bus Services

3.7.1 As set out in **Section 3.4**, the nearest bus stops to the site are located on R445 Newbridge Street.

3.7.2 Analysis of the timetables above in the AM and PM peak hours (08:00-09:00 and 17:00-18:00 respectively) has been undertaken to establish the absolute capacity of the bus services running along Newbridge Street at peak times, and to estimate the percentage of this capacity that demand from the development may take up. **Table 2** shows the results of this analysis at the eastbound (Dublin-bound) stop. The analysis conservatively assumes that all of the buses that pass the stops are single-deckers, and assumes capacity is based on the number of seats (when in reality there will be an additional number of standing spaces).

Table 2. Calculated bus capacity R445 EB

Time Period	No. Buses	Total Capacity (seats)	Finlay Park Bus Demand (people)	Finlay Park % of capacity
AM Peak (08:00- 09:00)	5	200	4	2%
PM Peak (17:00 - 18:00)	4	160	3	2%

3.7.3 **Table 2** shows that there is an estimated total bus capacity of 200 seats in the AM peak hour, and 160 seats in the PM peak hour. The estimated demand from the proposed development (assuming all new passengers head eastbound) would take up around 2% of this capacity at peak periods, which is not deemed to be significant.

3.7.4 **Table 3** shows the results of this analysis at the westbound (Newbridge-bound) stop.

**Table 3. Calculated bus capacity R445 WB**

Time Period	No. Buses	Total Capacity (seats)	Finlay Park Bus Demand (people)	Finlay Park % of capacity
AM Peak (08:00- 09:00)	3	120	4	3%
PM Peak (17:00 - 18:00)	4	160	3	2%

3.7.5 **Table 3** shows that there is an estimated total bus capacity of 200 seats in the AM peak hour, and 160 seats in the PM peak hour. The estimated demand from the proposed development (assuming all new passengers head eastbound) would take up around 2% of this capacity at peak periods, which is not deemed to be significant.

### **Future Bus Services**

#### *Connecting Ireland Rural Mobility Plan*

3.7.6 **Whilst the development is not dependent upon the emergence of future bus services, it is useful to set out how these might evolve in the wider area.**

3.7.7 The Connecting Ireland Rural Mobility Plan is a major national public transport initiative developed by the National Transport Authority (NTA), with the aim of increasing connectivity, particularly for people living outside major cities and towns.

3.7.8 Connecting Ireland seeks to make public transport for rural communities more useful for more people, and it will do this by:

- Improving existing services;
- Adding new services; and
- Enhancing the current Demand Responsive Transport (DRT) network which meets the transport needs of people who live in remote locations.

3.7.9 The proposed service improvements that will directly improve bus services to and from Naas are:

- A new local bus route from Caragh, Prosperous, Cooleragh, Allenwood, Robertstown, and Kilmeague to both Naas and Newbridge
- A new local bus route from Naas via Kilcullen, Narraghmore, and Castledermot to Carlow
- A new local bus route from Sallins via Naas, Blessington, Ballymore Eustace, Baltinglass, and Castledermot to Carlow
- A new local bus route from Sallins (Rail Station) via Naas, Blessington, Glendalough, Wicklow, and Rathnew to Arklow

3.7.10 As a general comment, the Plan notes that, *“The minimum level of service we have identified is a starting point in many cases. Where our analysis demonstrates a warrant for levels of service above the minimum, we will plan to provide that, where funding can be identified. Improvements may be delivered in stages as the project proceeds”*

3.7.11 The rollout of new and improved services has begun, and is continuing on a phased basis from 2023 to 2026.

#### *Naas Sallins Transport Strategy*

3.7.12 Three measures that are identified in the NSTS will enhance bus travel from the Finlay Park development. These are:

- PT2 Bus Interchange at Naas Harbour;
- PT4 Western Spine' Local Bus route;
- PT 11 'Bus -Only' link to Sallins Bypass;

3.7.13 These services, which will deliver bus services that run directly past the site between the town centre and Northwest Quadrant, in tandem with the bus enhancements set out in the Rural Mobility Plan, will further enhance bus frequency and capacity for residents of the development.

#### **Existing Rail Services**

3.7.14 The passenger volumes presented in the NSTS provide a useful indicator as to the likely percentage impact of demand from the Finlay Park development at the Sallins & Naas station.

3.7.15 In 2017, recorded daily passenger volumes recorded that 1,783 people boarded a train at the station. Taking the overall 409 person trips departing the Finlay Park development over the course of a day, and assuming a 2% rail mode split (as recorded in 2016 census data), this results in an increase of 8 persons boarding at Sallins & Naas station, an increase of 0.4%, which is not deemed to be significant.

### **3.8 Summary**

3.8.1 The site is very well-located to support sustainable travel, being able to offer:

- The site enjoys good access to local services in Naas by both walking and cycling.
- There is an extensive range of amenities and services within a 15-20-minute walk of the site including schools, services, and retail and employment opportunities.
- The site enjoys excellent access to recreational walking and cycling routes along the Grand Canal, both to the west and the north.
- Good options for commuters travelling to Dublin, who can either travel directly by bus from Naas, or travel by bike / bus / car to Sallins / Naas rail station, and then onwards into Dublin Heuston. Expansion of the DART service to Sallins will further improve options for commuters.
- In the future the site will enjoy enhanced walking, cycling and public transport links both into Naas town centre and to the north-west towards Sallins, as a result of the measures set out in the NSTS.

## 4. FACILITIES WITHIN THE DEVELOPMENT

### 4.1 Pedestrian Facilities

- 4.1.1 New pedestrian and cycle paths within the development have been designed in accordance with the Government's Design Manual for Urban Roads and Streets - 2019 (DMURS), the national Cycle Manual (2011 and any subsequent updates), Draft GDA Cycle Network Plan (NTA, 2021) and the Draft KCDP.
- 4.1.2 The proposed site design provides excellent access to, from, and within the development for pedestrians. Within the site, footpaths will be provided alongside all of the internal roads. In addition, footpaths will be provided through greenspaces providing direct pedestrian access to building entrances and short cuts between roads.

### 4.2 Cycle Facilities

#### Infrastructure

- 4.2.1 The development will provide a segregated cycle track on the east side of Old Caragh Road within the site, which will link into existing facilities on Old Caragh Road. This will provide a continuous off-road route to the south between the development site and the Ploopluck canal bridge (and the western spur of the proposed Naas Sallins Greenway along the south bank of the canal), and on to the R409 and the K Leisure site.
- 4.2.2 An east-west cycle track will also be provided along the north side of the development, which will provide cycle access into the north of the site, as well as access to a future cycle route to the harbour. This spur could also connect into the main Naas-Sallins Greenway alongside the canal, providing recreational routes in both directions between the two settlements.
- 4.2.3 The future continuation of a road link from Old Caragh Road, through the Northwest Quadrant, to M7 J9a, will incorporate some form of cycle provision. Once complete, this will provide a continuous cycle link from the site to Sallins.

#### Parking

- 4.2.4 In total, 388 cycle parking spaces will be provided. This comprises:
- 300 residents parking spaces, which will be located securely within the undercroft area.
  - 74 visitor spaces, 27 of which will be located in the undercroft, and 47 on cycle racks throughout the development.
  - A further 14 spaces outside the commercial premises.
- 4.2.5 The above level of provision fully complies with current and emerging KCDP standards.

### 4.3 Public Transport Access

- 4.3.1 Although at present no bus services run along Old Caragh Road, in the longer term (5-10 years), the NSTS envisages that a bus link will run from a new interchange within the harbour, and through the Finlay Park site to link up with a 'bus only' link running northwards through the Northwest Quadrant to M7 J9a and beyond to Naas Sallins Rail Station.

- 4.3.2 The development proposals allow for a bus route from the identified PT2 Harbour Bus Interchange to loop around the north of the site, and connect into Old Caragh Road at a crossroads, before continuing northwards towards the Millennium Link Road.

#### **4.4 Vehicle Access**

- 4.4.1 Vehicle access into the residential area will be provided via a new priority junction on Old Caragh Road. Should Old Caragh Road become a through route for the Northwest Quadrant, there is the potential to upgrade the priority junction to a signalised junction (with bus priority) if required.
- 4.4.2 The access road will run east from the junction, loop around the south of the development, and then enter a parking undercroft on its eastern site.
- 4.4.3 The internal roads within the development will be 6m wide, and have 2m footways on either side. Corner radii will be reduced as far as possible to help reduce vehicle speeds.
- 4.4.4 Further traffic calming measures will be incorporated at the detailed design stage. These are likely to take the form of measures such as differentiated surfacing, localised narrowing and horizontal deflections.

#### **4.5 Summary**

- 4.5.1 The development will provide high-quality walking and cycling infrastructure within the site boundary, which will link into the existing facilities on Old Caragh Road. Plentiful cycle parking will be provided within the development.
- 4.5.2 The development has been designed to allow the integration of future transport schemes such as:
- Future bus routes between the harbour and the north-west quadrant;
  - Extension of cycle routes to the harbour area; and
  - Potential provision of bridges over the Grand Canal, improving walking and cycling links to the town centre.

## 5. PRE – OCCUPATION BASELINE MODE SHARE

### 5.1 Purpose of the Baseline

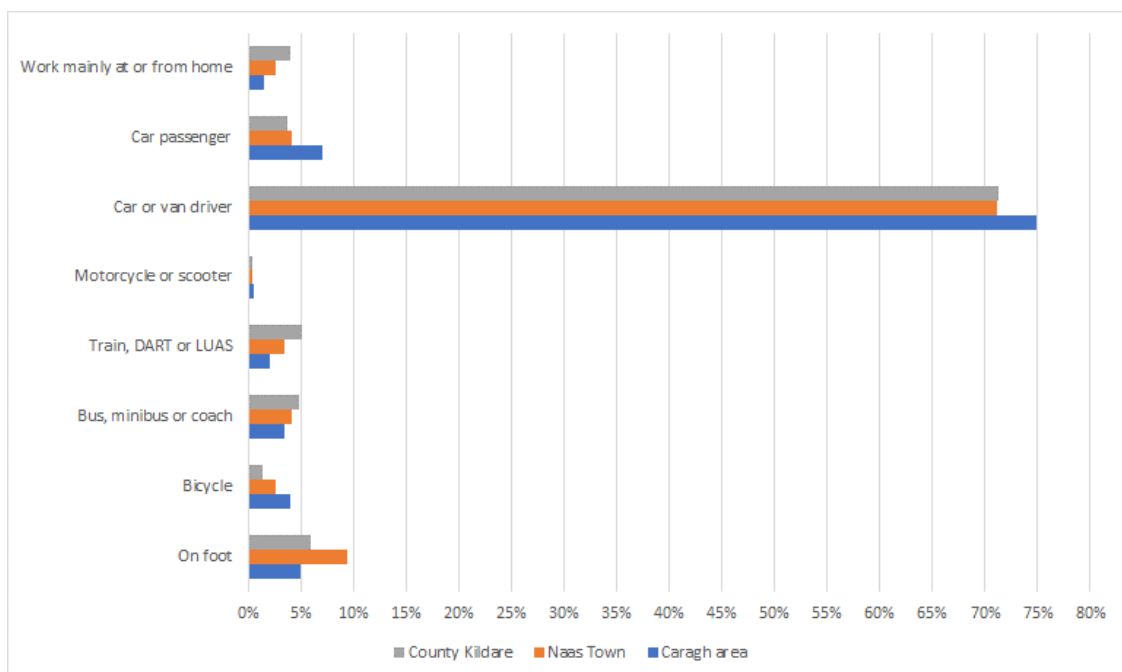

5.1.1 This section provides information on the travel behaviour of the existing population of the locality and similar development types. This is necessary to predict the likely travel patterns of future residents at the development site and identify existing constraints which may impact upon the sustainability of future development.

5.1.2 The subject site is located within a city suburban area with a mix of residential and commercial land. The proposed development comprises wholly of private apartments for sale.

### 5.2 Mode Share

5.2.1 Using the ‘Small Area Population Statistics’ (SAPS) from 2016 Census data, the work and education commuting mode shares for the Caragh Area, which includes the site, have been analysed.

5.2.2 **Figure 7** shows the breakdown of mode share for the Caragh area of Naas, and a comparison with Naas as whole, and County Kildare. Respondents who failed to record on answer on the census have been excluded from the analysis, as have those working mainly from home.

**Figure 7. Caragh Commuting Mode Share 2016**

5.2.3 As shown in **Figure 7**, commuting patterns in the Caragh area are consistent with patterns within Naas and across the wider County Kildare area. The predominant mode of commuter travel is as the driver of a car or van, with 75% travelling by this mode, and a further 7% travelling as passengers in private vehicles.

5.2.4 In 2016, 2% of people worked mainly at home, but this proportion is now likely to be much higher following the changes in working practices as a result of the COVID outbreak. Research published by the Central Statistics Office found that 16% of people started working fully from

home, and 6% increased their hours working from home. Since the return to workplaces, these numbers will have fallen, but a significant number of people will have continued to work from home at least some of the time.

- 5.2.5 This means that the number of outbound and inbound commuter trips is likely to be lower than assumed in the analysis.

## 6. MMP OBJECTIVES AND TARGETS

### 6.1 Aims and Objectives

6.1.1 The overall aim of the MMP for the proposed development is to minimise the proportion of single occupancy vehicle trips and address the forecast transport impacts of the end-users of the site. The objectives can be summarised as follows:

- Consider the needs of residents in relation to accessing facilities for employment, education, health, leisure, recreation and shopping purposes, including identifying local amenities that are available to reduce the need to travel longer distances;
- Reduce the vehicular traffic generated by the development to a lower level of car trips than that predicted within the Transport Assessment – including developing measures to reduce the need to travel, such as the provision of ancillary facilities (gym, food/beverage facilities, business area co-working spaces, convenience retail and parcel delivery/collection services); and
- Develop good urban design by ensuring permeability of the development to neighbouring areas and provision of cycle facilities.

### 6.2 Targets

6.2.1 Targets are the specific quantitative goals based on the objectives described above. Targets are important as they give the MMP direction from its inception, providing measurable goals. When setting site-specific targets, it is important that they are 'SMART' (Specific, Measurable, Achievable, Realistic and Timebound) in order that the outcome can be quantified and an assessment of what the MMP has or will achieve can be made.

6.2.2 Since the overall aim of the MMP is to reduce reliance upon the private car, it is appropriate to set a target which relates to this objective. The primary outcome indicator used will be mode share of the residents of the proposed development.

6.2.3 It will therefore be necessary to collect data to identify and understand the post-occupation baseline and ongoing travel habits, against which the MMP's progress can be measured. It is recommended that residents' travel surveys are undertaken within six months of the site reaching occupancy. These travel surveys will establish the post-occupation baseline travel data for the site and inform the final MMP's targets.

6.2.4 The proposed pre- and estimated post-occupation targets are outlined in **Error! Reference source not found.** These are based on the Census 2016 commuting mode share for Rathfarnham and the estimated development mode share. They are also considered in the light of the Irish Government's target of a maximum of 45% of car-based work commuting established under in "*Smarter Travel – A Sustainable Transport Future*".

	SINGLE-OCCUPANCY CAR USE	SUSTAINABLE TRAVEL MODES	WORK FROM HOME
Estimated Pre-Occupation Baseline Mode Share	75%	23%	2%
Longer-term Mode Share Target	65%	30%	5%

**Table 4. Proposed Residential MMP Targets**

6.2.5 The targets are based upon the following primary factors:

- **The location of the development** close to local services, amenities and employment opportunities in the town centre.
- **The future development of the Harbour and Northwest Quadrant**, which will result in bus services directly passing the site.

6.2.6 The final mode share targets over a three and five-year period will be set once the post-occupation baseline mode share is known, which will be obtained through the baseline residential travel surveys described above.

6.2.7 As part of the MMP Measures (described in more detail in the next chapter), personalised travel planning sessions could also be used to identify and indicate barriers affecting sustainable transport usage among residents of the development – and thus inform the potential for further mode shift and updates to MMP targets.

## **7. MMP ACTION PLAN**

### **7.1 Proposed MMP Action Plan Measures**

7.1.1 Mobility management plans have a wide range of possible “hard” and “soft” tools from which to choose from with the objective of influencing travel choices. The following section introduces proposed MMP measures that can be implemented once the site is occupied. The finalised measures within the MMP will be informed by the insight gained by the Post-Occupation Baseline Travel Survey results.

7.1.2 The proposed residential MMP Action Plan is summarised into the following sections:

- Mobility Manager;
- Reducing the need to travel;
- Welcome Travel Pack;
- Marketing and Travel Information;
- Personalised Travel Planning;
- Walking;
- Cycling;
- Public Transport; and
- Managing Car Use.

### **7.2 Mobility Manager**

7.2.1 A Mobility Manager will be appointed, and their role is to manage the implementation of the MMP. The role involves being the main point of contact for travel information, promotion, and improvements. This may also be organised in the form of a resident’s group once the development is fully occupied and operational. The remit of the Mobility Manager includes the following:

- To develop and oversee the implementation of the initiatives outlined in the MMP Action Plan;
- To monitor the progress of the plan, including carrying out annual Residential Travel Surveys;
- To actively market and promote the social, economic, and environmental benefits of sustainable travel to residents; and
- To provide sustainable travel information, support and advice to residents including available bus service timetables, walking, and cycling maps, car-sharing, the site’s car club and cycle hire services, and local cycling and walking schemes and events.

### **7.3 Reducing the Need to Travel**

7.3.1 The provision of on-site services to reduce the need of residents to utilise a vehicle to travel will be crucial to embedding a sustainable travel culture within the site from the outset. On-site services need to be actively promoted to occupants; on that basis a mix of amenities will be provided on site.

## 7.4 Welcome Travel Pack

- 7.4.1 A 'Welcome Travel Pack' will be provided to all new residents when they first move in, so that each household is made fully aware of the travel choices available to them. This will also give the best possible opportunity to the new residents to consider more sustainable modes of travel at a key moment of life change (i.e. moving home) – where new travel habits are more easily encouraged.
- 7.4.2 The Welcome Travel Pack will include a variety of sustainable travel information and incentives about the development and the wider local area. It can include measures such as:
- Information on the site's available sustainable travel services and on-site facilities (e.g. parcel collection);
  - Incentives to trial sustainable travel, such as:
    - Public transport 'taster tickets' via a Leap 'pay as you go' card for each resident;
    - Discounts at a local bike shop to subsidise a bike purchase; free branded cycling accessories (e.g. high vis reflectors, seat covers, water bottles); free or subsidised cycle skills training or cycle maintenance training; and
  - This can be offered to residents on a 'pick-and-mix' basis up to a certain value (e.g. €100), with residents selecting the incentive package that best meets their own individual travel needs.
  - Information on services and amenities provided locally (both on-site and nearby), particularly those within walking and cycling distance;
  - Maps showing the pedestrian and cycle routes in proximity to the site, including site cycle parking; advised routes (with journey times) into the city centre and to public transport interchanges;
  - Information about local public transport services and tickets, including a plan showing the location of bus and Luas stops, and bus routes to rail stations;
  - Information on the health benefits of walking and cycling;
  - Details of online car-sharing services (e.g. Liftshare<sup>1</sup> and Fxi<sup>2</sup>) along with the benefits of car sharing, such as reduced congestion, better air quality, reduction in traffic noise and cost savings to the individuals taking part; and
  - Provide information on the financial and environmental costs associated with driving and support regarding tips for green driving techniques.
- 7.4.3 A draft Welcome Travel Pack has been provided in **Appendix C**. This can be updated and distributed at the time that the first properties are occupied.

## 7.5 Marketing and Travel Information

- 7.5.1 Marketing and raising awareness will involve directly engaging with individuals and raising awareness of travel options as well the benefits of sustainable and active travel.

---

<sup>1</sup> Not currently operating in Ireland but are planning to enter the market.

<sup>2</sup> Private groups are set up and not open to the general public. Fxi offers closed company groups with member access controlled by the group administrator which could be operated by the Mobility Manager.

7.5.2 The Mobility Manager will market and promote the MMP to residents of the site in the following ways:

- Production and distribution of the Welcome Travel Pack as described above;
- Producing dedicated printed Travel Options Leaflets (in addition to the Welcome Packs) and online information which can be personalised to suit the individual needs of the site;
- Once travel surveys have been undertaken, additional leaflets can be provided which are tailored to encourage travel by a specific mode of transport;
- Organising events and activities (e.g. Dr Bike sessions, Pedometer challenges, led walks, cycle training) to coincide with Bike Week, European Mobility Week and any other national / local sustainable travel or community events;
- Displaying regular updates on MMP targets and activities in communal areas of the residential development; and
- Promotion of sustainable travel options to residents, focusing marketing initiatives on areas where there is willingness to change and promoting positive messages e.g. getting fit and active, reducing congestion and CO<sub>2</sub> emissions.

7.5.3 Continued incentivisation of sustainable travel using gamification may also be considered as part of the future development of the MMP – for example through the use of app platforms such as BetterPoints (<https://www.betterpoints.ltd/app/>) which operates in Ireland where residents are rewarded for sustainable travel. Typically, initiatives like this are organised on a city-wide or local-area basis – therefore if implemented on a wider scale, the development could benefit from participation in such challenges/competitions.

## 7.6 Personalised Travel Planning

7.6.1 Personal Travel Planning (PTP) is a well-established and proven method that encourages people to make more sustainable travel choices. Typically using motivational interviewing techniques, it seeks to overcome the habitual use of the car, enabling more journeys to be made on foot, bike, public transport or in shared cars. This is achieved through the provision of tailored information, incentives, and motivation directly to individuals to help them voluntarily make more informed travel choices.

7.6.2 PTP tools and techniques that can be used as part of a Residential MMP to encourage people to travel sustainably include:

- One-to-one conversations, either at the doorstep or by telephone, between individuals and trained field officers to encourage and motivate a change in behaviour; and
- The provision of information and support on how to travel sustainably, for example, maps or guides about the local bus network, walking and cycling routes, adult and child cycle training and bike maintenance classes.

7.6.3 PTP techniques have been reported to reduce car driver trips by 11% and the distance travelled by car by 12%<sup>3</sup>. A successful PTP can deliver:

- Reduced congestion and reduce car use;

---

<sup>3</sup> UK Department for Transport Making Personal Travel Planning Work; Research Report (2007) <https://webarchive.nationalarchives.gov.uk/20101007203323/http://www.dft.gov.uk/pgr/sustainable/travelplans/ptp/makingptpworkresearch.pdf>

- Individual health improvements through increased walking and cycling;
- Greater use of public transport;
- Better air quality and reduction in traffic noise;
- More use of local services by residents;
- Support sustainable economic growth by reducing peak hour congestion;
- Encourage more active lifestyles to address health and well-being issues; and
- Promote environmentally responsible travel choices and carbon reduction by helping reduce individual carbon footprints.

## 7.7 Walking

7.7.1 Depending on the outcome of the Post-Occupation Baseline Residents Travel Survey, the following measures could be implemented to promote walking to residents:

- Participation in a Residents' 'Pedometer Challenge';
- Organise events such weekend led walks;
- Display local walking maps in communal areas (and online if applicable); and
- Highlight the direct savings and health and wellbeing benefits of walking.

## 7.8 Cycling

7.8.1 Depending on the outcome of the Post-Occupation Baseline Residents Travel Survey, the following measures can also be implemented to promote cycling to residents:

- On-site cycle maintenance and repair facilities (e.g. fixed bike pumps located adjacent to cycle parking; bike repair kits available through the concierge service)
- Provide and publicise cycle parking for residents and visitors;
- Extending cycle hire schemes to the vicinity of the site;
- Display local cycling maps in communal areas (and online if applicable);
- Host a Bike Week ([www.bikeweek.ie](http://www.bikeweek.ie)) event for residents, inviting local bike suppliers for residents to try bikes before buying and run bike maintenance / Dr Bike sessions;
- Set up a residents Bicycle User Group (BUG) to promote cycling and encourage Bike Buddy scheme and led cycle rides through this forum; and
- Highlight the direct savings and health and wellbeing benefits of cycling.

## 7.9 Public Transport

7.9.1 Depending on the outcome of the Post-Occupation Baseline Residents Travel Survey, the following measures can be implemented to promote public transport to residents:

- Provide timetables and maps of local bus routes and the nearest bus stops, (including walk times) in communal areas;
- Promotion of the National Public Transport Journey Planner ([www.journeyplanner.transportforireland.ie](http://www.journeyplanner.transportforireland.ie)) for travel by bus and rail;
- Promotion of the availability of Real Time Information on the Dublin Bus app and website ([www.dublinbus.ie](http://www.dublinbus.ie)) which provides live information on bus departure times for main bus routes that serve the site); and
- If required, liaise with the NTA and local bus operators about any feedback gained from residents such as location of bus stops, timing of routes, or where you have market information about a potential new route.

## 7.10 Managing Car Use

7.10.1 Depending on the outcome of the Post-Occupation Baseline Residents Travel Survey, the following measures can also be implemented to help manage residents' car use:

- Promotion of car-sharing services (e.g. Liftshare) in communal areas and online;
- Car parking spaces reserved for car club services (e.g. GoCar, Yuko);
- Discounts or promotion of longer-term car-rental services (e.g. through Hertz) for tenants requiring car use for longer periods of time;
- Organise a car-share matching event for residents. This can match residents willing to offer / find a lift for specific journeys;
- Marketing of the financial and carbon benefits of car-sharing incorporated in communication messages to residents; and
- Promote green driving techniques and tips.

## 8. MMP MONITORING AND REVIEW

### 8.1 Overview

- 8.1.1 This section sets out the monitoring strategy for the MMP. The monitoring strategy is important for assessing how effectively the MMP has been in achieving its aim, objectives, and targets. It can help identify measures that are not meeting objectives and reallocate resources accordingly. An MMP is a continuous and evolving document requiring monitoring, review, and revision to ensure that it remains relevant.

### 8.2 Travel Survey

- 8.2.1 As already stated, a travel survey of residents will be undertaken within six months following occupation of the proposed development. The results of the survey will identify baseline travel patterns in terms of modes used and the sustainable transport modes which require encouragement through the MMP measures.
- 8.2.2 The survey is designed to identify the distribution and mode share of trips from the development. The survey will also identify people's willingness and ability to try new modes, and what barriers they may face in making smarter travel choices.
- 8.2.3 The results of the survey will be used to inform the development of the finalised MMP targets and measures.

### 8.3 Annual Monitoring

- 8.3.1 The Mobility Manager will carry out annual follow-up travel surveys with future residents. These surveys should take place in the same month and be of the same format as the original baseline survey to ensure compatibility of results.
- 8.3.2 This monitoring is an opportunity to measure MMP achievements on an annual basis. This will then inform the ongoing development of the MMP, ensuring its targets and measures remain relevant to the needs of the residents, is site-specific and fit for purpose. Results will be analysed to enable the following:
- Measurement of the success of the MMP, enabling focused improvement on areas that have not achieved the desired modal shift via appropriate revisions to the MMP measures;
  - Identification of early success stories of the MMP, which can help to encourage further participation and build momentum for sustainable travel;
  - Ensures that changing travel patterns are considered, ensuring that the MMP measures can be updated to reflect the needs of residents; and
  - Allows targets which have been set too low or unrealistically high to be readjusted.
- 8.3.3 Annual survey results will be submitted to KCC, which will set out the current Travel Plan initiatives, and what is proposed over the coming year.
- 8.3.4 In the event that initial targets set out in the MMP are not met, this will present an opportunity for a calibration exercise for future target setting and MMP Action Plan refresh and review.

## 9. SUMMARY

- 9.1.1 SYSTRA Ltd has been commissioned by Westar Homes Ltd (the applicant) to produce a residential Mobility Management Plan (MMP) for the proposed Finlay Park development.
- 9.1.2 The Mobility Management Plan is the principal mitigation measure proposed by the TA to address the forecast transport impacts of the development, and has been prepared as a Pre-Occupation Plan to support the planning application.
- 9.1.3 This Mobility Management Plan report should be read in conjunction with the accompanying Transport Assessment, which sets out the existing transport baseline conditions in detail, sets out the Access Strategy for the development, and assesses the impact of the scheme.
- 9.1.4 The site is well- situated to support sustainable travel options, particularly for travel into the town centre via the Ploopluck Bridge. Current access to bus services is adequate, and will improve as the Harbour, and North-West Quarter development comes forward.
- 9.1.5 High quality cycling and pedestrian facilities have been a key focus of the development design, and the site is well integrated into local networks.
- 9.1.6 A Mobility Manager will be appointed to co-ordinate the delivery of the Post-Occupation Baseline Travel Survey, the finalisation of MMP targets and the development and implementation of the Post-Occupation Residential MMP. The Mobility Manager will also ensure ongoing promotion and marketing of sustainable travel options to the residents of the development.
- 9.1.7 The Welcome Travel Pack that will be issued to all residents will encourage households to travel sustainably from the outset.
- 9.1.8 Other measures will be determined by the results of the Post-Occupation Baseline Travel Survey.
- 9.1.9 As the MMP is a continuous and evolving document it will be monitored, reviewed and revised to ensure that it remains relevant. Annual survey results will be submitted to KCC, which will set out the current Travel Plan initiatives, and what is proposed over the coming year.

## **Rothair ar Thraenacha Comaitéara agus DART Bicycles on Commuter and DART Trains**

Tá cead rothair a thabhairt ar sheirbhísí Comaitéara agus DART idir 10:00 agus 15:30 agus tar éis 19:00 ó Luan go Aoine agus i gcaitheamh an lae Dé Sathairn agus Dé Domhnaigh.

Má tá rothar agat ar thraein Comaitéara nó DART, tabhair aird ar na nithe seo a leanas le do thoil:

- Ba chóir do chustaiméirí éirí dá rothar istigh sa stáisiún agus ar ardáin.
- Ba chóir do chustaiméirí leas a bhaint as na rampaí agus ardaitheoirí inrochtaineachta i stáisiúin seachas dul an staighre.
- Ba chóir do chustaiméirí fanacht in aice a rothair ar bord na traenach.
- Ní beidh cead ag leanbh nach mbeidh duine fásta leis rothar a thabhairt ar bord.
- Níl cead rothair leictreacha a thabhairt ar thraenacha.
- Níl cead rothair a mbeadh leantáin i bhfostú dóibh ar thraenacha.
- \* Beidh srianta i bhfeidhm ar ócáidí a mbeadh imeachtaí speisialta ar siúl.

Bicycles are allowed on Commuter and DART services between 10:00 and 15:30 and after 19:00 Monday to Friday and all day Saturday and Sunday.

If you are travelling with your bicycle on Commuter or DART trains please note the following:

- Customers should dismount from bicycles when they are in the stations and on the platforms.
- Customers should use accessibility ramps and lifts rather than stairs within stations.
- Customers should stay with their bicycles onboard trains.
- Unaccompanied children cannot bring bicycles onto trains.
- No motorised bicycles are allowed on trains.
- No bicycles with attached trailers are allowed on trains.

\* Restrictions will apply on occasions of special events.

# APPENDIX C – WELCOME TRAVEL PACK

# TRAVEL OPTIONS GUIDE 2022

Finlay Park, Naas

# Welcome to your new home.....

This Travel Guide provides information on how to save money, improve your health, and help the environment by making greener travel choices.

This pack contains:

- ❖ Public transport route maps and information;
- ❖ Walking, cycling and sustainable travel guides; and
- ❖ Advice on lowering your fuel consumption and tips for travelling more sustainably.

# Smart Travel

Managing how you travel is a great way of reducing your travel costs, helping the environment and improving your health. Why not consider the following:

- ❖ If you work, are there any flexible working opportunities available to you? Can you occasionally / frequently work from home one day a week or alter your working hours, so you don't always need to travel during peak periods?
- ❖ Can you save money on public transport travel? Are you entitled to a railcard or monthly bus pass, or does your employer offer travel incentives?
- ❖ Are you driving your vehicle in the most efficient way possible? See our *Driving Tips* for more information.
- ❖ You don't need to change your travel behaviour overnight. Think about travelling 'smarter' a couple of times a week, experiment with different travel modes, and try to keep your journeys varied.

# Impact on the Environment

In the Programme for Government and the Climate Act 2021, Ireland committed to halving our greenhouse gas emissions by 2030 and reaching net zero by 2050 at the latest.

Transport is by far the largest source of energy-related CO<sup>2</sup> emissions in Ireland. Before the COVID-19 pandemic it was responsible for over 40% of energy related CO<sup>2</sup> emissions in 2019.

The plan calls for a significant cut in transport emissions by 2030 through measures including:

- ❖ Increasing the proportion of kilometres driven by passenger electric cars to between 40% and 45% by 2030, in addition to a reduction of 10% in kilometres driven by the remaining internal combustion engine cars.
- ❖ All replacements for bus and commuter rail vehicles and carriages to be low or zero carbon by 2030.
- ❖ Increased rollout of rural public transport through Connecting Ireland. [42-50% reduction in emissions by 2030] .
- ❖ 500,000 extra walking, cycling and public transport journeys per day by 2030.

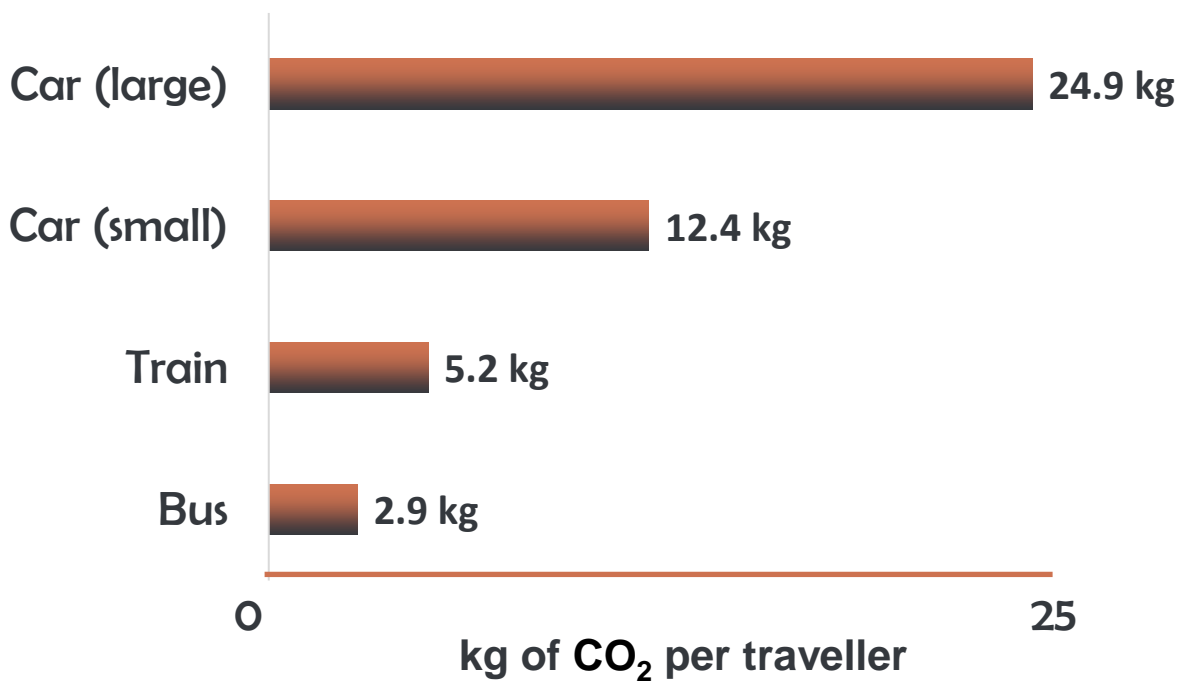

# Carbon Calculator

The carbon calculator below demonstrates the difference changing your travel behaviour could have on your carbon footprint:

## Carbon emissions from travelling 60 miles

# Walking and Cycling

In Ireland, nearly three quarters of journeys are made by car. In 2019 car trips accounted for 73.7% of all journeys. Active travel is encouraged for shorter trips.

**WALKING** can be easily incorporated into our daily routines. Virtually all trips include walking links to other forms of transport. Walking is a realistic option for most journeys of up to 2 miles.

## Did you know?

- ❖ Walking one mile in fifteen minutes burns around the same number of calories as running a mile in 8.5 minutes.
- ❖ Walking 10,000 steps per day contributes to the recommended level of physical activity for adults.
- ❖ A 20-minute walk, or leisurely cycle, can burn 100 calories.

## Quick Wins.....

- ❖ Use the stairs instead of the escalator or lift.
- ❖ Walk to the local shops.
- ❖ Walk the children to school.
- ❖ Take a walk during your lunch break.
- ❖ Build a walk into your journey to work.
- ❖ Get off the bus at an earlier stop.

There is the potential to increase the number of **CYCLING** trips on journeys of up to 5 miles. Cycling can lead to significant improvements in health and fitness levels. It is a reliable and convenient form of transport; takes you from door to door and is a fast alternative, especially when the roads are congested.

### Tips to start cycling more

- ❖ Try a cycle route to your place of work at the weekend to work out how easy it is and how long it will take.
- ❖ Cycle to your gym or sports club (it can be your warm-up).

### Things to consider

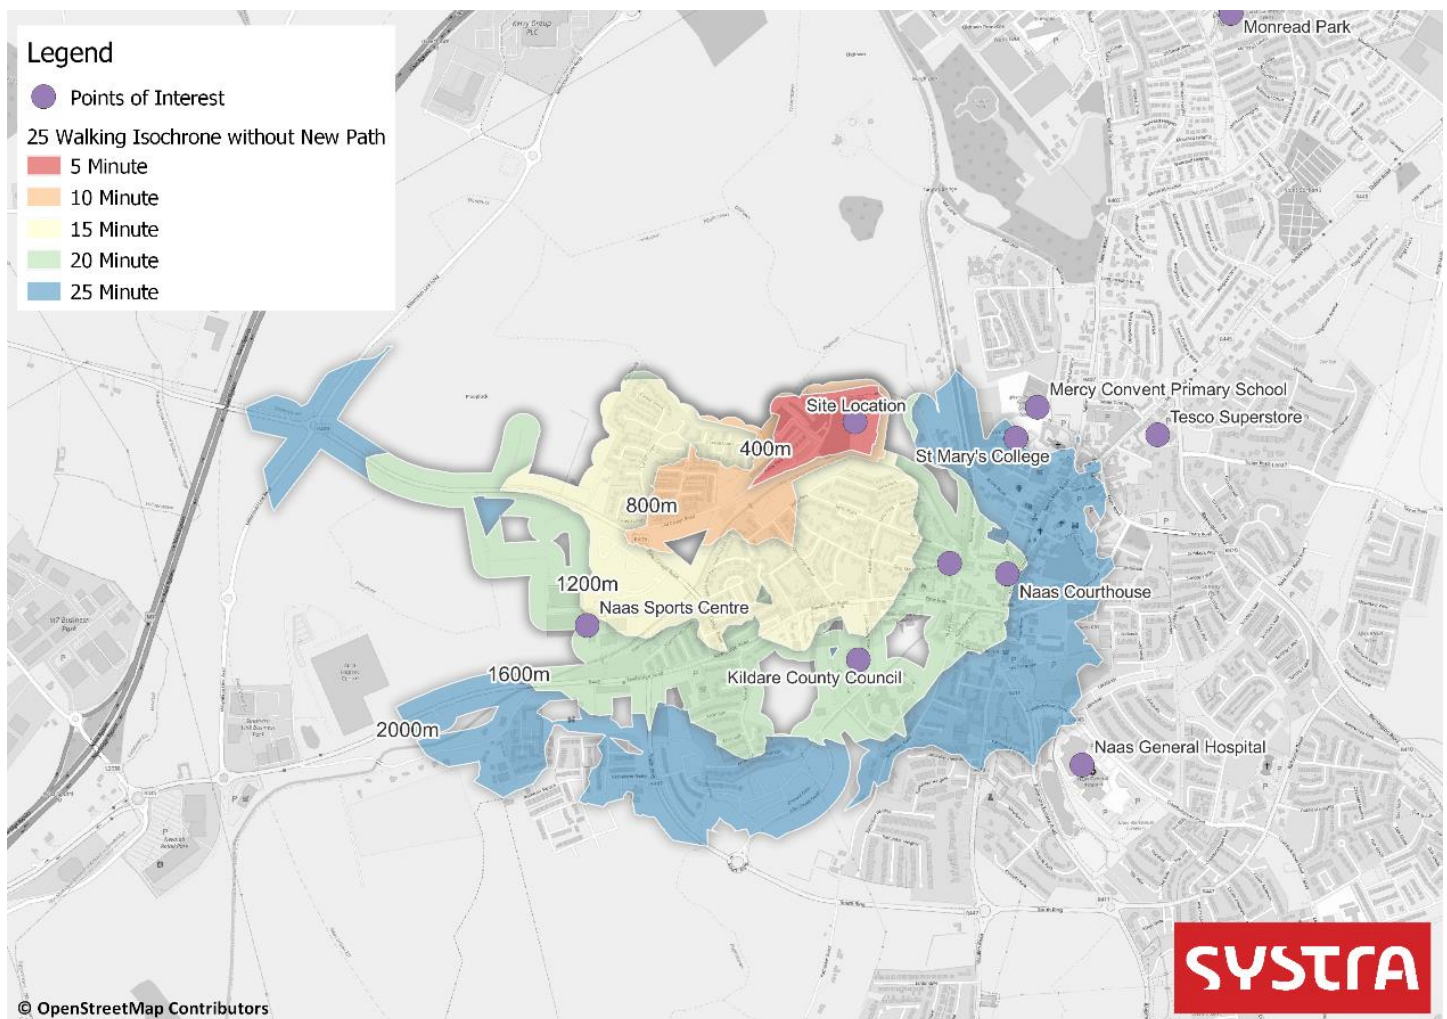

- ❖ Is your bike road-worthy?
- ❖ Have you got the right sort of bike?
- ❖ Have you got somewhere to lock your bike at your destination?
- ❖ Invest in a good quality bike lock.
- ❖ Always take a bike light with you.
- ❖ Always wear a helmet.

# Walking from home

## Walking Isochrones

- ❖ The walking map below shows the areas within a 25-minute walk of your new home.
- ❖ Most destinations in the town centre are within a 15-minute walk via the Ploopluck Bridge.

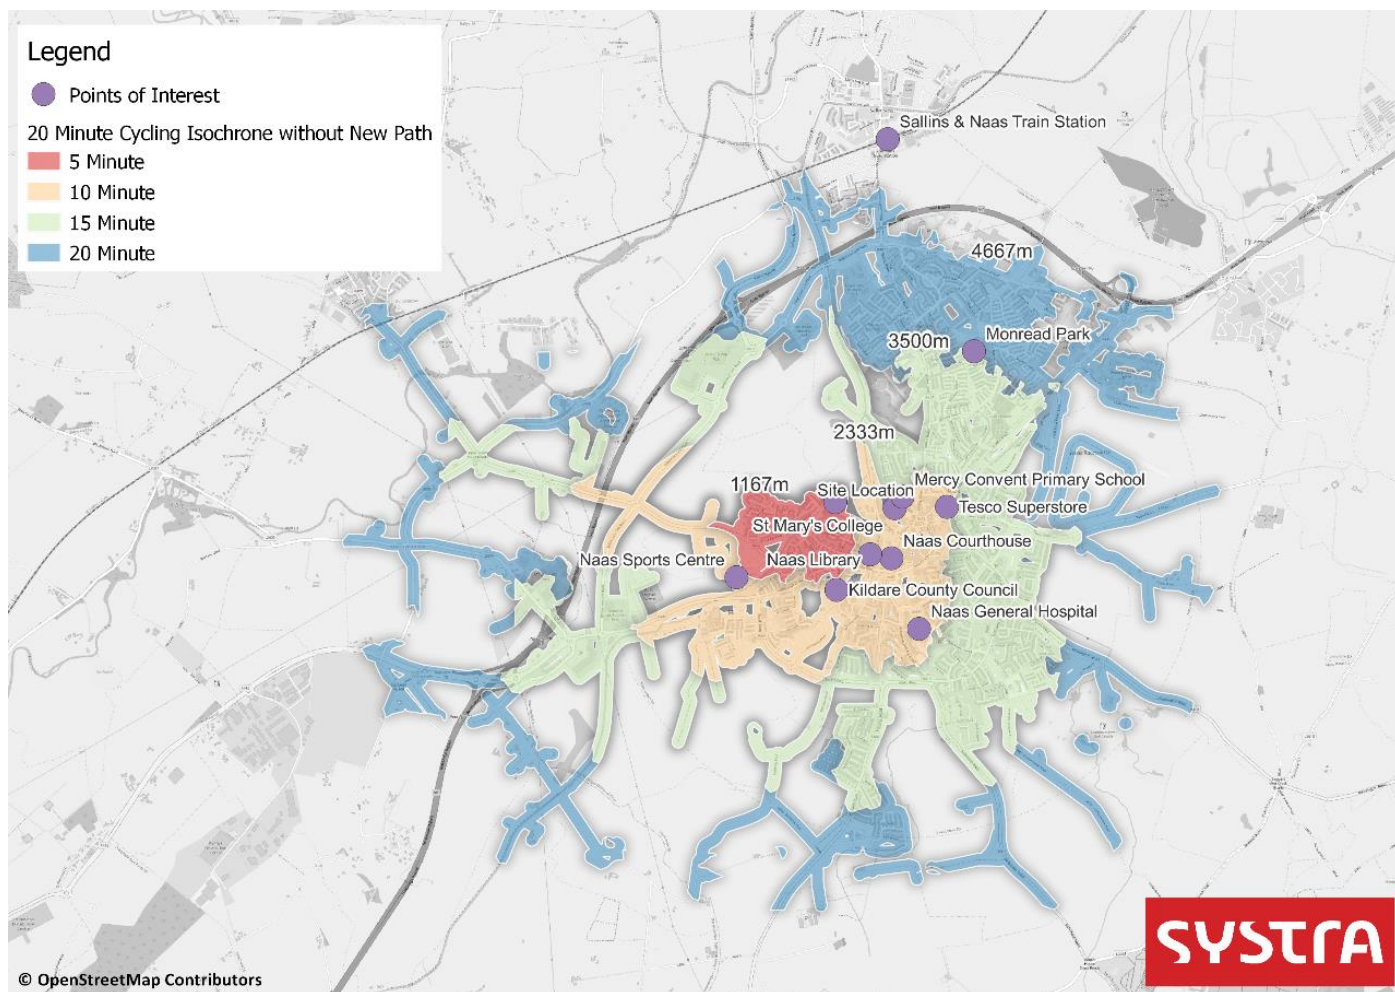

- ❖ Historic trails in Naas are shown below on the 'Into Kildare' website.

<https://intokildare.ie/directory/things-to-do-in-kildare/naas-historic-trail/>

# Cycling from home

## Cycling Isochrones

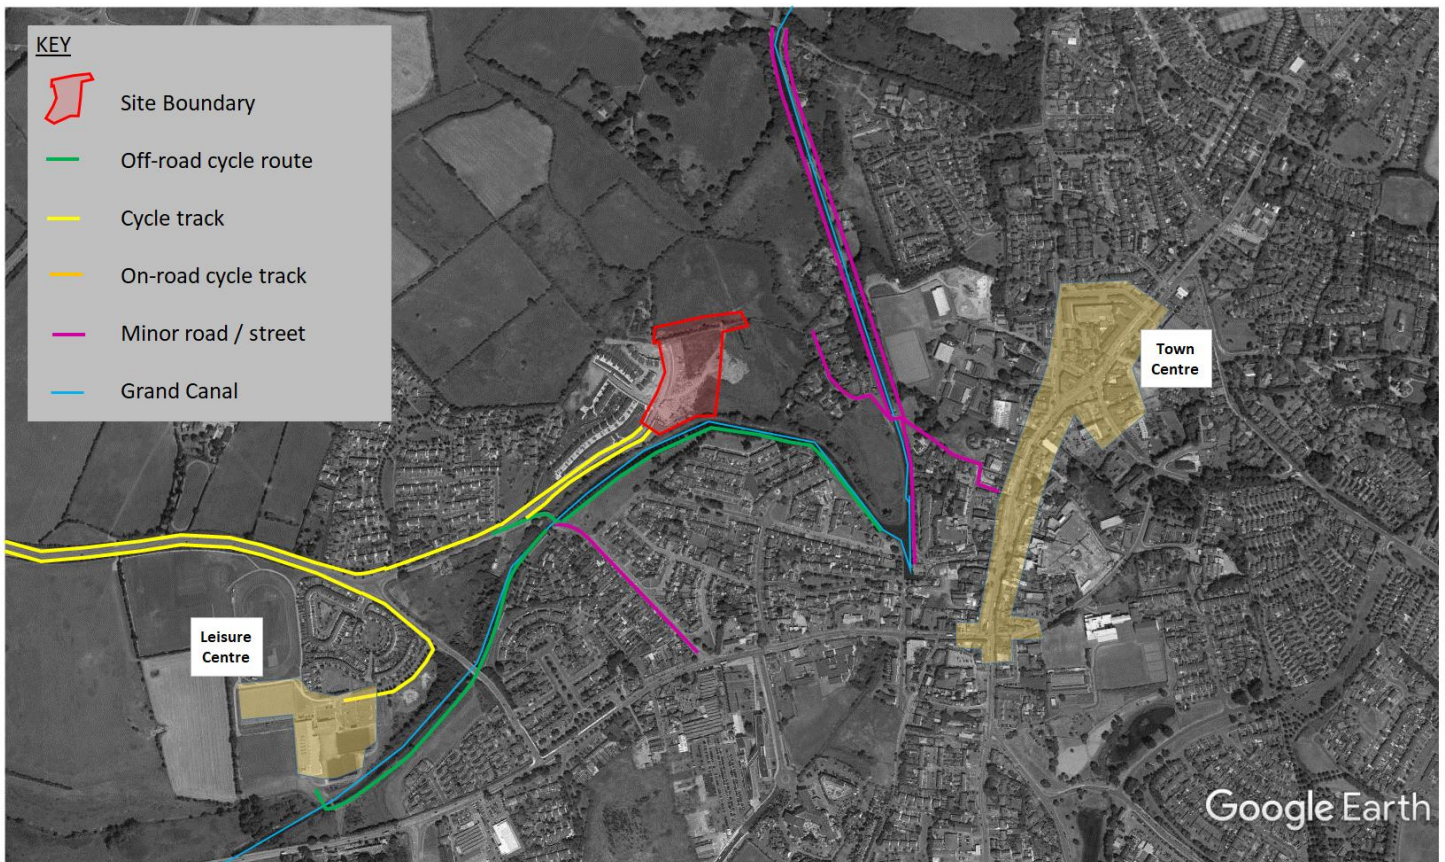

- ❖ The cycle map below shows the areas within a 20-minute cycle of your new home.
- ❖ The town centre is within a 5-10 minute cycle..
- ❖ All of the Naas urban area is within a 20-minute cycle.

# Naas Cycle Infrastructure

## Naas Cycle Infrastructure

- ❖ The figure below shows the key Cycle infrastructure in Naas.
- ❖ The cycle tracks alongside Old Caragh Road provide a quick and safe link to the tracks on the south side of the Grand Canal. This links west towards the Leisure Centre and right towards the town centre.

# Public Transport

Some people find that using public transport is more relaxing than driving. It gives you the chance to read a book, look at your phone, or do some work while you travel. For many, this removes the stress of driving on congested roads or searching for parking spaces.

Purchasing a season ticket can make public transport more cost-effective and you can plan your journey by checking out your travel options at:

<https://www.transportforireland.ie>

[https://www.buseireann.ie/?utm\\_source=galwaygaa](https://www.buseireann.ie/?utm_source=galwaygaa)

“ If every bus took just one more car driver, we could save up to 1.2 million tonnes of CO<sub>2</sub> every year.

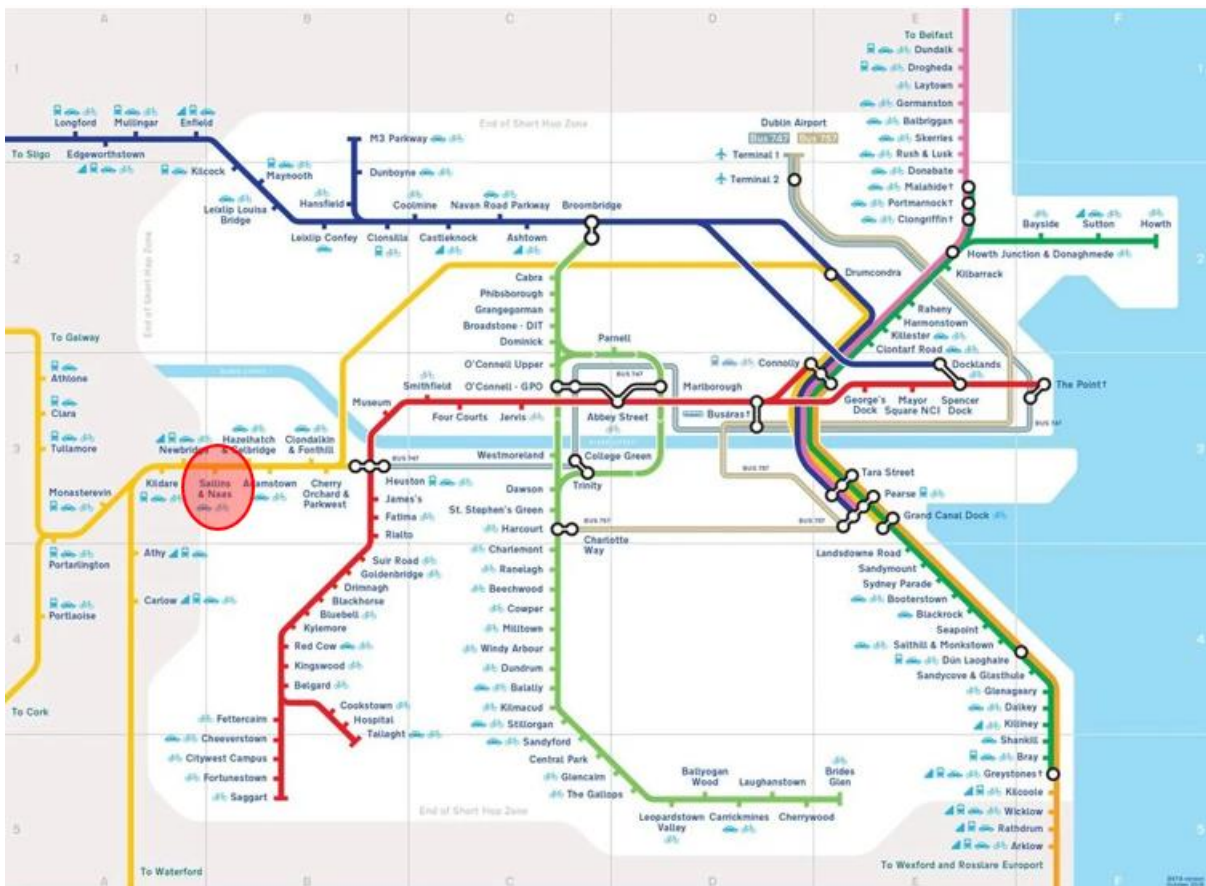

## Buses

- ❖ The closest bus stops are located on the R445 Newbridge Road which is around 900m from the site boundary, which equates to about an 11 minute walk.
- ❖ From here there are regular services to Dublin, the airport and Kilkenny.

## Trains

- ❖ The nearest train station is at Sallins, 3km to the north of Finlay Park.
- ❖ Bus Service 139, operated by JJ Kavanagh and Sons runs between the centre of Naas and the Sallins Rail station. It runs at two-hourly intervals Monday to Sunday, taking 15 minutes to travel between Naas and the Station. A return fare from Naas costs 6 Euro.
- ❖ There are typically 2-3 train services per hour in both directions. The journey time between Sallins / Naas and Dublin Heuston for direct trains is typically 22 minutes

# Journey Sharing

If it is necessary for you to drive, why not think about car-sharing?

By car sharing on one day out of five, you can reduce your costs and save potentially hundreds of pounds on the cost of fuel and car maintenance. Think what else you could spend that money on.

Sharing your car with someone else is a good way to motivate yourself to get out of the car and use alternatives. Other benefits include:

- ❖ It's sociable.
- ❖ It can be safer, for example having someone to travel with at night.
- ❖ It saves you money.
- ❖ It reduces the number of cars on the road – resulting in less congestion.

# Smarter Driving Tips

Follow these tips and see if you can save money on running your car, as well as doing your bit for the environment:

- ❖ Maintain a steady speed, using the highest gear possible. Abrupt starts and stops can waste fuel.
- ❖ Use the handbrake and not the clutch when you're stationary. Using the clutch adds wear and tear and is an unnecessary use of fuel.
- ❖ Start moving as soon as possible. A cold engine uses much more fuel. A car warms up faster when it is moving so drive off as soon as possible after starting the engine.
- ❖ Switch off the engine straight away when you park. Sitting with the engine running burns fuel, wastes money and is harmful to local air quality.
- ❖ Keep your tyres correctly inflated. Not only are under-inflated tyres dangerous, but they lead to an increase in fuel consumption. Try riding a bike with under-inflated tyres and you'll soon appreciate how much extra effort is required!
- ❖ Remove unnecessary loads from your car. Extra weight needs extra fuel to get moving.
- ❖ Switch off any unnecessary electrical functions. Only use your heated rear-view window if you really need it and switch it off as soon as possible to conserve energy.

# Top Ten Ways to Travel More Sustainably

1. Consider if your journey is really necessary.
2. Consider walking for all or part of your journey.
3. If you are able, think about cycling for all, more or part of your journey.
4. Use public transport, check operator websites and apps or call them for information on services.
5. To make public transport cheaper, buy a monthly or annual ticket. Contactless payment is often capped at the most efficient daily ticket price.

6. Don't waste travel time; plan your journeys before you leave and try, if possible, to avoid the busiest times.
7. Travel differently for one day of the week.
8. Car share with somebody else to share costs and help to reduce the number of cars on the road.
9. If you drive, use park and ride facilities – for example at Sallins and Naas train station there is car parking and great links to Dublin and other areas.
10. Drive more efficiently and maintain your vehicle
